

RadonTec AlphaBlock 4+

AlphaBlock 4+ is an extra-rugged, self-adhesive radon protection film with integrated fleece that can be used in both new construction and interior renovation of existing buildings.

Radon tight system with protective fleece for protected installation in different construction variants, AlphaColl sleeves for punctures of the foil, AlphaTape for sealing interfaces and AlphaSeal for bonding to the floor slab/wall.

	DIN EN 14909
tested according to	DIN EN 13967
Radon tightness test	Surface: passed transition/adhesive joint: passed
fire class and fire behavior	DIN EN ISO 11925-2 and EN 13501-1
Water tightness	EN 1928 A+B: passed
Water vapor permeability	EN 1931: sD: ≥ 1500 m
Resistance to impact load	EN 12691: method A passed
Shear resistance of the joint	EN 12317-2: 215N
Weight	approx. 20 kg/roll
Dimensions	60 x 1.2 m
