

RadonTec AlphaSeal

AlphaSeal is a two-component, mineral, polymer-modified thick coating (FPD) with fast rain resistance, plasterable and crack-bridging.

In addition, the sealing slurry is radon-proof and is used for bonding the AlphaBlock 4+ indoors and outdoors on walls/floor slabs.

Color	dark gray
Solid	Approx. 90 wt. %
Density (+20°C)	Approx. 1.2 g/cm ³
Processing temperature	+ 2°C to + 30°C
Processing time	Approx. 45 min
Rainproof after	Approx. 2 h
Insulation board bonding after	Approx. 4 h
Can be filled after	Approx. 16 h
Radon tight	From 3 mm TSD
Resistant to pressurized water	After 24 h (up to 10 m water column)
